

3-Technical & Engineering Companies

- **Technical & engineering companies consist of companies active in all fields of technical and engineering services and are mostly member of the ICCA and are rated by the Management and Planning Organization of IR of Iran. These companies include consultants and contractors.**

In the past decades, the Iranian companies have focused on raising their standards and efficiency to international levels. Consequently they are now qualified to participate in many international tenders followed by implementation of numerous projects all around the world, mainly in Africa, Asia, South America, CIS countries and the Persian Gulf region. These projects include all fields of activities such as design, engineering, construction, erection, commissioning, procurement, operations and maintenance in civil, mechanical and electrical engineering fields for power plants, refineries, roads, airports, seaports, bridges, tunnels, dams, housing and urban planning, industries and commercial complexes among others.

Due to several important competitive advantages such as low cost of well qualified human resources, abundant and highly skilled labor, proximity and extensive modern machinery and equipment, access to numerous manufacturing plants and industries and extensive rail, road, sea and air transportation facilities companies have been able to complete their projects on time, on budget and to international standards.

In order to expand foundation, penetrate and maneuver in the world markets, and optimize strength and potentials, Iranian companies seek to join forces with international partners to create mutually-beneficial relationships that will generate new opportunities and result in successful projects worldwide.
