

7- Cooperation Proposal

Iranian companies, herewith express their willingness to make necessary cooperation with their counterparts For investment, collaboration and implementation of development projects.

The aforesaid cooperation among techno-engineering companies of the two sides would be executed in each one or a third country with relative advantages and capabilities to receive the joint services of I.R. of Iran and interested companies for their native projects.

In order to develop and expand the relations and cooperation between the two companies in all specialized technical, engineering, construction and industrial fields, the **International Consultants and Contractors Association of Iran (ICCA)** will bring coordination between the companies and will encourage them to participate in investment, establishing joint ventures and entering into operational activities and performing different types of projects.
